Providing Services

Management Philosophy:

Contribution to the creation of the optimum environment between people and nature through construction business.

IWATA CHIZAKI will strive to fulfill this changing role with responsibility and pride, and as a **“company that creates the future”**, we will meet diversified customer needs of not only traditional infrastructure development, but also rehabilitation of the aging infrastructure, prevention of large-scale natural disasters, safety and peace of mind, environment preservation, and other important responsibilities.

Scope of Business Activities:

1. Building construction, civil engineering, pavement construction, and associated investigation, planning, surveying, designing, management, and consulting services
2. Design and supervision of building construction projects
3. Purchase and sale, brokerage and leasing, property management, planning and appraisal service of real estates
4. Residential estate development and sale
5. Community development, urban development, development of overseas construction projects, and associated engineering, management and planning services

Project Achievement/Technical Expertise

Since its founding in 1922, IWATA CHIZAKI has devoted itself to improving its technology and services with a “customer first” policy. Nowadays, as a leading construction company in Hokkaido Prefecture, we have expanded our business not only in Japan but also to overseas markets such as Asia, Africa, East Europe, and Central & South America.
