## Providing Services

For over 70 years, we have been active in the four fields of water, sewerage, waste / environment, and information processing. We are constantly thinking about how we will contribute in each field, and are striving to develop technology based on the needs of the next generation. In addition to work such as design and planning, which has been a strength since the company was founded, we will continue to propose business management, wide area, public-private partnership, etc., and continue to propose the introduction of asset management including ICT as an "ISO55001" certified company. A comprehensive environmental service company.

### Waterworks

#### Planning / Design

##### Business Content

- Basic planning, detail design, renewal planning
- Analysis and planning of pipe networks
- Planning and design for expansion projects
