What MADAGASCAR can OFFER

Potential Markets:

• Madagascar Internal Market: 22 Million Population (doubling within 25 years)
• Madagascar as major supplier of the Indian Ocean Islands for Food Security
• Access market to the SADC countries (FTA 15 Countries with 277 Million Population, 660Billions USD of GDP)
• Access market to COMESA countries (FTA 19 Countries with 443 Million Population 519Billions USD of GDP)
• Prospect of the Tripartite Access to SADC-COMESA-EAC for FTA, Customs Union, Common Market, monetary Union and Single Currency.

Island of Unique and Hotspot Biodiversity:

• Interest focus on Researches and Development (Natural Sciences; Biotechnology and Pharmaceutics, etc.);
• Land of Discovery and Tourism.

Rich and Diverse Human Capital:

• Young, Cheap and Moderately Skilled Labour;
• Strong Cultural link to Asia
Vast Reserve Arable Land:

- For Agriculture: Role to play in terms of Regional and Global Food Security;
- For Energy: Bio-Energy (Biodiesel, Ethanol etc..); and Renewable Energy (Spaces for Solar; Wind; Hydro etc...);
- For Forestry and Logging: Role to Play on Fights against Climate Change (Carbone Trade);

Reserves of Natural Resources of World Importance:

- Mining Resources: Precious Stones; Rare Earths; etc.;
- Petroleum and Gas: On-Shore and Offshore;
- Fishery and Coral Reefs.

Strategic Geographical Position of Madagascar:

- Hub for World Maritime Merchandise Traffic;
- Highway for Energy Transport;
- Historically Gate of Indian Ocean.
Strong Political Will of the New President HE Hery RAJAONARIMAMPIANINA for a “Strong and Stable State” and the “Rule of Law” through the three following commitment pillars:

- By ensuring **security** (persons, goods and investments);
- By ensuring the **independence of the judiciary** system and;
- By **fighting against corruption** and committing for more transparent and accountable governance.

Madagascar aspires for an “accelerated, inclusive and sustainable growth”:

- As a recovery response to the 5 years of crisis, the new Madagascar Government is optimistically and aggressively challenging to attain the vision of the President for a “**Madagascar as a Modern and Prosperous Nation**”.
The priority development strategies of the government will be focused on the four main axes as follow:

• Improvement of the Governance and the Rule of Law;
• Acceleration of inclusive growth; and the promotion of employment creation; effective decentralization for a more equitable territorial (local) development;
• Improvement of the access to basic social services (education, health, water and hygiene) and a more proactive and adaptive human resource development;
• Protection of the Madagascar’s unique environment; Towards a Green Economic Growth by mainstreaming strategy for adaptation and mitigation to climate change adverse effects.

Some Indicators of Economic and Development Goals to be achieved within 2 years:

• Double digit Economic growth;
• Attain a high rate of investments allocations (at least 25% of GDP, through public investments mainly on infrastructures);
• Creation of 500,000 employment and;
• Reduction of poverty rate by 7 to 10 points.
Facilitation through a New Improved Code of Investment:

- Facilitation on doing business and FDI in Madagascar by the services of the EDBM
- Special Economic Zones approaches by promoting PPP (New Creation and Concentration of Economic Activities; new cities and clusters of industrial zones)
- Integrated Growth Poles approaches for existing Regional Economic Potentials (Nosy-Be Island for Tourism Development; Antananarivo-Antsirabe for Industrial Development; Fort-Dauphin for Mining and Tourism Development; Extension soon for other Regions): one example is the promotion of investment zones at Ehoala Port in Fort-Dauphin (For import-exports related activities such as: Fisheries, Mining and Natural Resources, Agribusines; Pharmaceutics, Cosmetics etc...)
- Franchise Zones approaches (For some competitive sectors such as textiles, garments, ITC and handcrafts etc...)
- Agriculture Investment Zones approaches: 4,145,400ha of unexploited land identified in 4 regions of Madagascar destined for social insertion and youth employment promotion but importantly for attracting Local and FDI investments projects.

Facilitation through a New improved law for exports:

- Facilitation on Exportation by the Installation of ITBM (or International Trade Board of Madagascar) as a One-Stop shop Service for Exports.
Facilitation through the Improvement of the Code of Tourism:

- **Tourism Investment Special Zones** approaches and specifically the Promotion of Concession Management at National Parks (launching of call for expression of interests for Pilote Projects in 4 national park sites in the north and east); and by the Promotion of Sustainable Tourism and Construction of “Cultural Villages”;

- **Aggressive reforms on Transportation and Communication**: Accessibility to all important tourism sites internally and internationally by deploying the National Airlines (Air Madagascar) and by partnering with potential countries for inbound tourism.

Facilitation through the Improvement of the Mining and Petrol Code:

- Special Treatments for Eligible Big Mining Investment (For instance the Ambatovy Project within which **Sumitomo Corporation** is involved);

- Attractive State’s Joint Venture on Petrol and Gaz Exploitation: some remained on-shore blocks open for bidding soon; and many other remaining off-shore blocks off the east coast of Madagascar in the Canal of Mozambique. Possibilities of Joint-Ventures to current exploration projects. The Government has decided to allow the internal commercialization of the heavy oil from Tsimiroro Project (Madagascar Oil).

New Law and Instruments for PPP Development in Madagascar:

- Energy (Promotion of Hydropower: launching of a pilot project of exclusive renewable energy of the Nosy-Be island estimated at 130Millions USD);

- Infrastructures (roads, ports and airports) etc.
Welcome you to embark on the journey
