**Investment Unit** : Approx. US$10K~$2M
Strategic CSR/CSV is a business strategy that is integrated with “Corporate Responsibility” and “Business Perspectives” to create both business value and positive social/environmental value in sustainable, effective, and expansible manner, whereas traditional CSR programs and donations focus mostly on reputation and have only a limited connection to the business, making them hard to justify and maintain in the long term.

Sustainable BOP business and social venture can be achieved by integrating business perspectives into CSR.

VISIT TO THE MODEL FARM: “BEARING EXCELLENT QUALITY NUTS!”

- Their carefully maintained orchard produces high-quality nuts without doubt.
The local people are extremely grateful for the new jobs and the industry being created.
Macadamia trees start producing nuts about 5 years after planting. It takes 7–10 years to produce commercial quantities of nuts.

Macadamia nuts are harvested manually after they have fallen on the ground. The harvesting period last 9–10 months in a year.

**Edible nuts**
- De-husking → Drying → Cracking → Sorting
- Use non-edible grade nuts to manufacture oil.
- Use macadamia nuts shells as mulch or fertilizer.

**Uses of nuts**
- Eating raw
- For garnish: cookie, ice cream, chocolate etc.
- Nuts oil: cooking, aesthetics, massaging, cosmetics etc.

No part gets wasted.
